

PRIOR AUTHORIZATIONS

Prior Authorizations are required on high cost, uncommon, and special case procedures. All prior authorizations are required to be reviewed by MotivHealth's medical director who determines if the service is a covered service, medically necessary and not experimental or investigational. MotivHealth wants to ensure that all members and physicians have a practically effortless preauthorization process. To further that effort, all preauthorizations require physicians to call the MotivHealth Preauthorization phone number: 1-844-234-4472. All pre-authorizations must be initiated by a physician.

1. All surgical procedures performed in the inpatient or outpatient setting.
